SECTION ON OPHTHALMOLOGY AMERICAN MEDICAL ASSOCIATION

The Annual Meeting of the Section on Ophthalmology of the A.M.A. will be held jointly with the Association for Research in Ophthalmology in New York City during the first week in June, 1953. The Scientific Exhibit of A.M.A. will run concurrently at the Grand Central Palace.

Titles and full abstracts of papers submitted for presentation at the meetings of the Section should be in the hands of the Secretary, Dr. Trygve Gundersen, not later than January 1, 1953. This is necessary in order to permit selection of papers and to make necessary arrangements for their competent discussion.

Papers of a technical nature are better submitted to the Association for Research in Ophthalmology. The winter sectional meeting of the Association will be held this year in Baltimore. Early submission of material is prerequisite for its inclusion in the program.

The Scientific Exhibit will entertain presentations of a purely ophthalmological nature, but would prefer to have material of interest also to the general practitioner. An exhibit in conjunction with a paper read before the section is of particular interest. The material can be either of a research or instructional nature.

Inquiries regarding the above may be addressed to Dr. Henry F. Allen, 200 Beacon Street, Boston 16, Mass. Section on Ophthalmology, Dr. Trygve Gundersen, 101 Bay State Road, Boston 15, Mass.; Association for Research, Dr. Hunter H. Romaine, 111 East 65th Street, New York 21, N. Y.; and Scientific Exhibit, Dr. William F. Hughes, Jr., 1853 West Polk Street, Chicago 12, Ill.

It is hoped that a lively response to this opportunity will be forthcoming.

ASSOCIATION FOR RESEARCH IN OPHTHALMOLOGY

The Fifth Annual Meeting of the Midwestern Section of the Association for Research in Ophthalmology will be held at the Oscar Johnson Institute, Elliot Auditorium, 640 South Kingshighway, St. Louis, Missouri, on March 27, 1953, beginning at 9:00 a.m. Dr. Alson E. Braley is secretary of the Section.

ALABAMA

Dr. Thomas D. Allen of Chicago delivered the Second Annual Thigpen Lecture at the Medical College of Alabama, Birmingham, on December 19, 1952. He spoke on "Pre-Glaucoma."

CALIFORNIA

Dr. Leonard Christensen, Assistant Professor of Ophthalmology, University of Oregon, was the guest speaker at the meeting of the Los Angeles Society of Ophthalmology and Otolaryngology held on December 4, 1952. His subject was "Retrolental Fibroplasia."

BOOK REVIEW

THE ESOPHAGUS AND ITS DISEASES
Eddy D. Palmer, M.D., F.A.C.P., Lieutenant Colonel Medical Corps, United States Army; Chief Gastrointestinal Section, Walter Reed Hospital; Consultant in Gastroenterology to the Surgeon General. Cloth, $15.00. 542 pages with 54 illustrations, two in color. New York, Paul B. Hoeber, Inc., Medical Book Department of Harper & Brothers, 1952.

There has long been a need for a comprehensive textbook on the esophagus and its diseases and the author has succeeded in integrating into one volume our present knowledge of pathologic physiology, diagnosis, and treatment of esophageal disorders.

Proper emphasis has been given to the fact that present-day management of esophageal diseases requires the combined diagnostic and therapeutic efforts of the clinician, radiologist, endoscopist, and thoracic surgeon.

The chapters on basic science are well done and will serve as a readable reference source for medical students and specialists alike. There are chapters on all the important diseases which primarily affect the esophagus as well as chapters on those systemic diseases which produce esophageal manifestations. Chapters 5 and 23, which deal with diaphragmatic hernias, and varices and hemorrhage, respectively, are particularly to be commended. The discussion on the management of portal hypertension and its complications is presented in a fair and conservative manner, the author stressing that the serious outlook for the patient with varices encourages vigorous prophylactic treatment even in the absence of a history of hemorrhage.

The reproductions of x-ray films are technically good and there are two colored plates of esophagoscopic views.

The book can be highly recommended to students, practitioners, and specialists.
